Thanks Brock and Nancy. Good discussion and to be continued...

I've attached the Idaho arsenic complaint. I'll try to take a quick look at this presentation tomorrow or Monday and let you know if I have any comments.

Thanks!

Thanks for the conversation today. While we didn't necessarily come to resolution, it's good to know that we may have options. Job security right?

Here's what I put together for next week on BAF/BCF. Best to look at it with the notes available for context.

Have a good weekend.

Brock

Hi Brock,

Lon and I are going to do a little digging on this topic with a few people here and at HQ. Wondering if it might be best to gather that information and have a brief call with the three of us sometime in the next couple weeks, if that works for you?

I'm assuming you may want to chat before the next technical meeting on 2/24, so maybe we can aim for later the week before or early the week of 2/22.

Let us know. Thanks,

Subject: Alaska HHC Question- Regional Considerations

Gentlemen,

If you are not working on much more pressing things...

I'm curious about your informal thoughts on the workgroup's discussion on regional issues such as marine mammal consumption, possibility of having a different trophic level specific to Alaska, and how that could affect Alaska's rulemaking.

Furthermore, is there federal resources available to develop a trophic level 5 should such a need exist?

Thank you for your consideration,

Brock Tabor
